PROJECTS

Creating Code Careers www.creatingcodingcareers.org

- Built with React for the Front-End and React Router for page navigation
- Worked with group to analyze, design, and develop a mobile-first responsive website
- Helped implement custom SASS CSS by using specific color schemes and containers for each webpage

Yellow Line Digital Portal www.yellowlinedigital.com

- Helped integrate/test SSO authentication using OneLogin and Passport in combination with the Loopback API
- Implemented some features on the Front-End using React that displays a personalized message when a user signs in and another message that displays when a disabled user attempts to login into Yellow Line Digital

PROFESSIONAL EXPERIENCE

October 2019 – Present **React Native Developer Intern / Kinder / Remote**

- Write unit and integration tests for application using the JEST testing framework
- Help ensure Sign Up, Forgot Password, and Login features are working properly with Google Firebase
- Implement a chat feature that filters users based on the group(s) that the current user belongs to

June 2018 – May 2019 **Tier II Desktop Support / ESRI / Redlands, CA**

- Utilized system and security knowledge in order to work on and troubleshoot software-related issues
- Worked with team members to learn and implement new technologies while meeting goals and objectives

July 2015 – May 2018 **IT Consultant / Vaneity Medical Weight Loss / Duarte, CA**

- Installed and configured application and system-related software in order to meet client's needs
- Troubleshoot various software issues relating to system performance, servers, etc. both on-site and remotely
