

# Michael Ramirez

## Full Stack Web Developer

### about me

Full Stack Web Developer who is passionate about coding and learning new tech stacks. Seeking to utilize my skills as an engineer in order to solve problems and provide business value for a company.

### EDUCATION

San Diego Code School  
*Full Stack Web Development*  
Escondido, CA  
2019

B.S. Information Systems  
*California State University*  
Northridge  
Northridge, CA  
2015 – 2018  
**In-Major G.P.A (3.54)**

### SKILLS

**Front-End:** JavaScript, jQuery, HTML5, CSS3, SASS, React

**Back-End:** Node, Express, MongoDB, SQLite, MySQL

**Tools:** Git, NPM, NOW, Heroku, Webpack, Parcel

**Additional:** AGILE, SCRUM Methodologies, JIRA

### PROJECTS

**Creating Code Careers Non-Profit Website** - Built with React for the Front-End and Node/Express for the Back-End. Worked with group to create a site that is responsive on both Mobile and Web-based devices. Implemented a Custom CSS layout using specific color schemes along with React-Router to be able to navigate between each page.

**Yellow Line Digital Portal** - Integrated SSO authentication using OneLogin and Passport which is a back-end component used with the Loopback API for MongoDB. Implemented some features on the front-end using React to display a personalized message when the user signs in as well as another message that tells the user to contact Yellow Line Digital if a user tries to login in with a disabled account.

### professional experience

June 2018 – May 2019 Enterprise Data Management Intern / Tier II Desktop Support / *ESRI / Redlands, CA*

- Provided advanced technical support to an enterprise of 4000+ employees with a quota of 8 – 12 tickets a day
